SLIM SLIDING WINDOWS AND DOORS

Slim Line has a simple concept that "Less is more". Frame and Track are Less visible so glazing offers wider view.

VERTICAL SLIDING

A window having one or more sashes which move only in the vertical direction; they are held in various open positions by means of friction or a ratchet device instead of being supported by sash balances or counterweights.

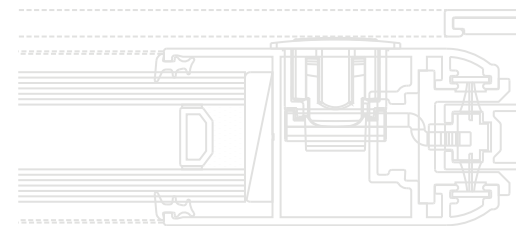

PIVOT WINDOWS

- Pivoting windows are a type of window with sashes that can rotate 90°–180° around a horizontal or vertical axis usually located on or near the center of the sash. The rotation of a pivoting window allows for full ventilation but cannot be equipped with a screen for filtering.
- This window type is generally reserved for use only in special situations requiring cleaning, maintenance, service, or emergency ventilation.

CASEMENT WINDOWS & DOORS

Two or more Sashes (Shutters) open horizontally on frame on the left or the right

BI FOLD SYSTEM DOOR

- Easy to operate with smooth functioning
- Offers huge open space result in maximum openings
- Ideal for-Multipurpose usage of Balconies, Villas, Luxury Bungalows, Large open spaces- can be used to convert large spaces into small spaces and small spaces into large ones whenever and wherever privacy is needed.

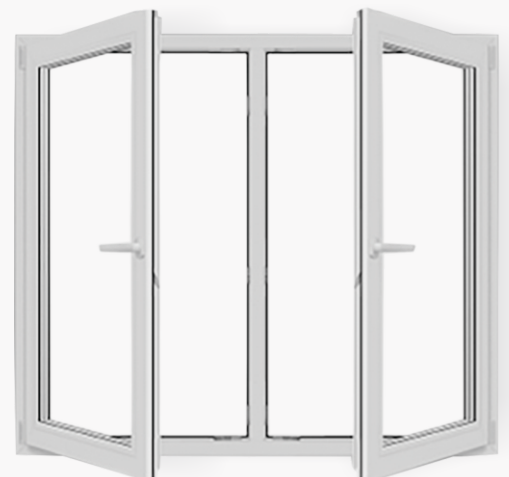

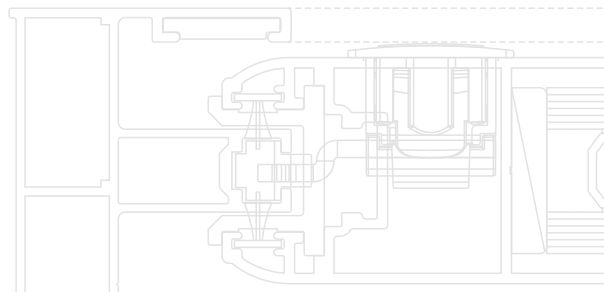

GEORGIAN BARS OPTIONS

- Traditional Georgian Bars provide the authentic appearance of individual panes
- Georgian bars give a beautiful modern look to your windows and doors
- Georgian bars can be placed in between the glasses or can be placed out

CASEMENT WINDOW

Adding an element of excitement to your room, these casement windows are ideal for the spots that are hard to reach at your home, like over the kitchen sink. The design of these windows is aesthetically neutral and durable.

TILT AND TURN SYSTEM

The window will swing inward when opened in the turn position; alternatively, hinges at the bottom allow it to open inward at the top. Both actions are activated by the turn of a lever, which controls all the mechanics within the frame. There are great benefits to the two opening positions of the tilt-turn window. The turn position allows ample fresh air to pass into the room; it also facilitates cleaning the window. Thus, offers sufficient ventilation in your dream home without disturbance of wind pressure.

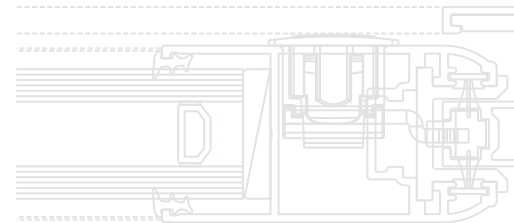

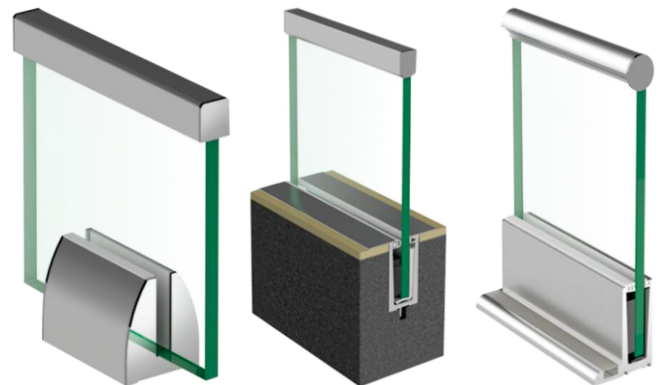

RAILINGS

Glass Railing can last longer than iron, which can get rusty at any time and wood that isn't reliable. Glass rails have endeared itself to a lot of people because it is easy to clean.

It looks stylish and sleek.

Glassrails are best suited for illuminating natural sunlight, thereby creating more space, complementing other equipment in the room, and act as a safety net.

GRILL BETWEEN GLASS OPTIONS

Grills add a special touch to your window and room. The aesthetic appeal of these windows lights up your room with its traditional charm. This classical pattern continues to impress every homeowner.

JALOUSIE LOUVERS

Jalousie windows allow you to control the airflow entering in the room. Jalousie louvre windows are amongst the safest, strongest, most functional and versatile louvre windows. The operating system is sturdy. With an inbuilt impenetrable security system and Weatherproof Seals, Jalousie louvres can be left open with complete peace of mind. Impenetrable Security

WINDOWS WITH GRILL

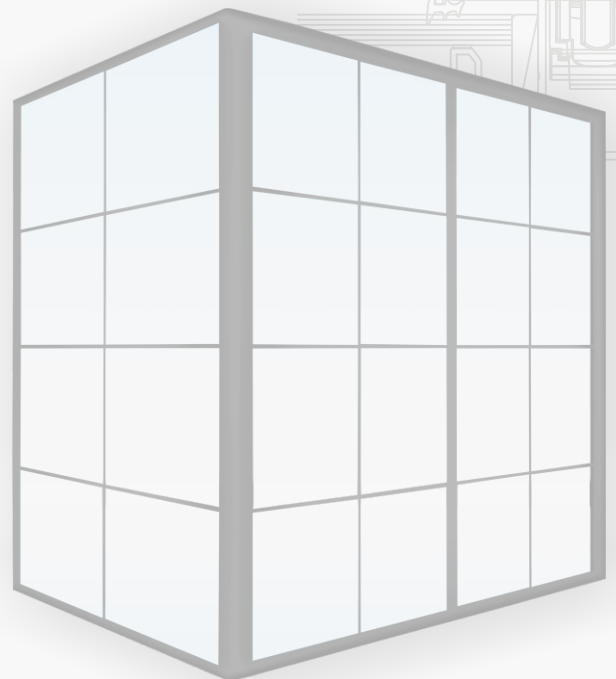

Safety and beauty are equal concerns for everyone when they think of finding the right **window grill design** for home

SLIM PARTITIONS
